Filtering face piece (class 3) (FFP3) respirator	No	Yes
Disposable eye protection	Yes	Yes

General guidance

Body bag	Not required*
Viewing	Permitted**

* Body bags are not required in terms of COVID-19 risk, but may be required for other, practical reasons, such as maintaining dignity or preventing leakage affecting the mortuary environment. Local, standard decontamination and disinfection procedures must be followed.

** There is a risk posed to mortuary staff from close contact with visitors and a small risk to visitors from contact with the deceased. **Local policy should be set** that covers considerations such as complying with social distancing procedures, complying with cultural requirements, ensuring visitors are made aware that there is a risk, asking visitors to view through a window, asking visitors to wear PPE, etc. Any decisions made by staff and/or refusals by visitors to comply with requests should be documented in the deceased's record.
